Reinforced TRI-Lock System

PlasticTack Glides

### The Most Secure Solution for Under-Desk Collection

When space is a concern, The Pup Series is your answer. Exclusive to Jake, Connor & Crew, The Pup Series offers a space saving, under-desk solution without sacrificing the security and durability offered with a traditional console. Fully compliant with Joint Commission and HIPAA regulations, The Pup Series' sleek, narrow design and plastic tack glides protecting the base from wet surfaces, make it the best solution for hospitals and medical facilities. Also available with unique grommet options designed for the collection of e-waste and pill bottles, The Pup Series is a versatile container that will meet all of your secure collection needs.

In response to increased demand for custom sized containers and options for the collection of e-waste and hard drives, our design team has engineered the Pup Series as a more durable and elegant alternative to plastic under-desk containers. Constructed with the same great features as our number one selling console series, the slim design allows for efficient shipping options making the Pup Series the perfect solution for all applications.

**Call today to take advantage!**
